

HEDGE FUNDS

24-hour course

Marc Hotimsky and Gregory Chouette

Marc Hotimsky is Former Executive Chairman of CQS, a London-based Hedge Fund specialised in credit and convertible strategies. He was the co-founder and head of Schroders NewFinance Capital until 2012. He was previously a member of Credit Suisse First Boston's Executive Board and responsible for CSFB's fixed income activities worldwide. Mr. Hotimsky worked previously with Bankers Trust (Head of Trading and Risk Management worldwide for all derivative products), as well as with Citibank and JP Morgan.

Gregory Chouette is Partner at Landy & Partners (London), an investment and risk advisory firm advising family offices, wealth managers, asset managers and institutions. He was previously Head of Investment Risk, Multi-Assets at Schroders. He held previously various positions in Schroders, New Finance Capital LLP and BNP Paribas, most recently as Head of Risk Management and Quantitative Research at Schroders New Finance Capital.

Course Outline

This course is designed to provide students with a thorough understanding of the nature of hedge funds and of their activities.

It will describe hedge funds and their risk / return profile, fee structure, and their legal structure, explain the rationale for investing in hedge funds (whether for returns, for risk reduction, or risk seeking) and articulate how this may fit in a wider portfolio.

The course will describe and assess the different possible strategies used in hedge fund investing. It will compare hedge funds with funds of hedge funds, explaining the potential added value of a fund of Hedge Funds with another layer of fees.

It will review the profile of hedge fund Investors and examine the emergence of managed accounts in the hedge Fund space. It will also set out in practical terms how to perform a proper due diligence.

The course will be based on significant quantitative analysis and sophisticated tools to measure ex-ante risk factors hedge fund investments, as well as the risk and the expected return of an entire hedge Fund portfolio, which are typically not available in university classes.

The course will illustrate relevant aspects through several case studies.
